

Progility: Dual Action Soft Chews Canine Hip & Joint Supplement with Probiotics

Product Specification: Progility is a dual action soft chew supplement for complete canine Hip & Joint health with the added benefit of probiotics.

Active Ingredients per soft chew: (Not Less Than)

Glucosamine HCl (shellfish origin).....	1000 mg
MSM (methylsulfonylmethane).....	800 mg
Creatine Monohydrate.....	500 mg
Chondroitin Sulfate (bovine origin).....	400 mg
Eicosapentaenoic Acid (EPA).....	18 mg
Docosahexaenoic Acid (DHA).....	12 mg
Vitamin C.....	5 mg
Vitamin E (DL-Alpha Tocopherol Acetate).....	50 IU
Hyaluronic Acid.....	10 mg
Manganese (Manganese Gluconate).....	5 mg
Probiotic proprietary blend of Lactobacillus acidophilus, Lactobacillus casei, Bifidobacterium bifidum, Lactobacillus fermentum, Lactobacillus plantarum, Lactobacillus reuteri.....	2x10 ⁶ cfu

Active Ingredient Profile:

Glucosamine HCL supplementation enhances the body's ability to manufacture collagen and proteoglycans, which are essential for maintaining and repairing joints, as well as in the production of the joint fluid that acts as a lubricant within the joint.

MSM (methylsulfonylmethane) supplements the diet with additional sulfur enabling the body's ability to synthesize collagen for connective tissue health, maintain membrane flexibility and promote cell regeneration. MSM is a strong antioxidant, capable of binding and inactivating free radicals.

Creatine Monohydrate enhances the energy required to fuel muscle contraction, strengthening the muscles that support and protect the joint.

Chondroitin Sulfate is an important structural component of cartilage, along with glucosamine; chondroitin sulfate has become a widely used in dietary supplements for treatment of osteoarthritis.

Eicosapentaenoic Acid (EPA) & Docosahexaenoic Acid (DHA) are Omega 3 fatty acids that are essential fatty acids the body cannot naturally produce. Omega-3 fatty acids have been found to alleviate sore joints, morning stiffness, and allow a reduction in prescription medications that are necessary for severely arthritic animals.

Vitamin C helps stop the progression of joint disease. It also heals wounds, repairs connective tissue, and is a vital ingredient in producing collagen.

Vitamin E (DL-Alpha Tocopherol Acetate) slows the rate of joint deterioration and is a powerful antioxidant that protects cell membranes and offers pain relief to Osteoarthritis sufferers.

Hyaluronic Acid is a revolutionary natural substance that lubricates and helps cushion joints improving mobility and relieving discomfort due to wear and tear of hips & joints.

Manganese (Manganese Gluconate) is a component of a powerful antioxidant called MnSOD which is essential for the proper development and maintenance of bones and cartilage. The combination of manganese, Vitamin C, glucosamine, and chondroitin in joint supplements may reduce the rate of degeneration of cartilage in your dog's arthritic joints.

Progility's Probiotic proprietary blend of Lactobacillus acidophilus, Lactobacillus casei, Bifidobacterium bifidum, Lactobacillus fermentum, Lactobacillus plantarum and Lactobacillus reuteri helps support a healthy immune system and promote ideal digestive absorption of active ingredients.

Other Ingredients: Rice bran, Lecithin, Starch, Water, Cheese Flavor, Safflower Oil, Glycerin, DL-Alpha Tocopherol Acetate, Fish Oil, Sorbic Acid, Calcium Propionate, Ascorbic Acid.

Daily Dosage Directions:

Initial Dosage first 4-6 weeks

Up to 30 lb.....1/2 a chew Daily
31-60 lb.....1 chew Daily
61-90 lb.....2 chews Daily
91 lb & over.....3 chews Daily

Maintenance Dosage:

Up to 30 lb.....1/2 a chew every other day
31-60 lb.....1/2 chew Daily
61-90 lb.....1 chew Daily
91 lb & over.....1 1/2 chews Daily

For dogs requiring more than one chew, divide between morning and evening.

Warning: For animal use only. Keep out of reach of children. In case of accidental overdose, contact health care professional immediately.

Storage: Store in a cool, dry place at room temperature 59-86F.
